

## Love.ly User Manual.

---

### Quick summary.

Love.ly takes care of the ever-painful date planning process for you. By using just a few simple features, you'll discover a whole new world of fun with that special someone!

The **area search bar** lets you choose the city or neighborhood for your date.

The **custom location search bar** lets you add specific places to your date.

The **map**, **date template**, and **itinerary** show you details about your date.

Love.ly picks three locations using a special ordering of place types specially selected for fun dates. Each category has a unique color which is consistent throughout the app. Only one place per color may be selected at a time.

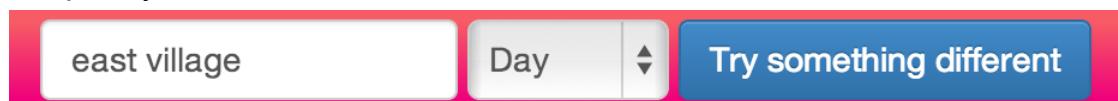

The **save/load bar** lets you store and reload entire dates from visit to visit, in case you want to view a date later.

---

### List of features.

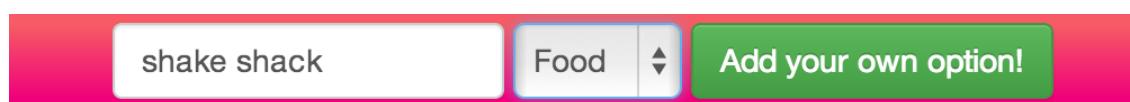

#### Area search bar.

To completely reset your date, either leave your previous search in the search bar, or type a new location, and click "Try something different." Also choose whether you're interested in a daytime date or a nighttime date. The **map**, **date template**, and **itinerary** will show a completely new date!

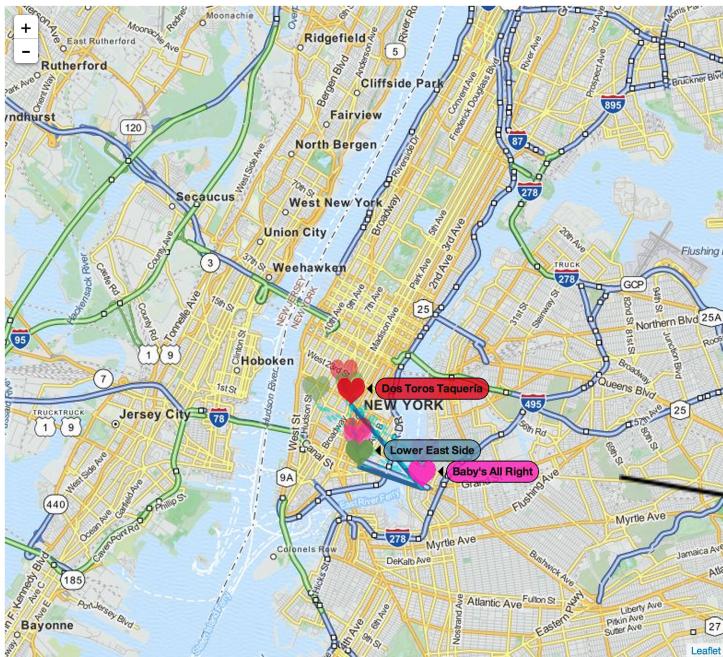

#### Custom location search bar.

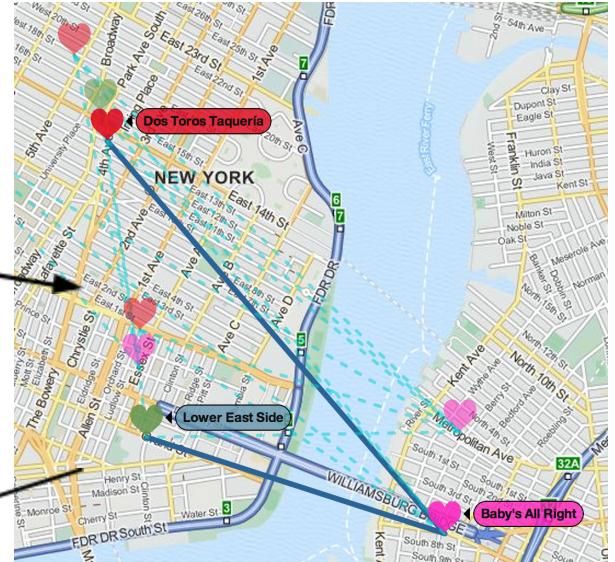

Have a specific place in mind you'd like to visit during your date? First, type the name into the **Add-your-own** bar. Then, select the place type from the drop down menu, and it'll be added to your **itinerary** and be updated on the **map**.

## Map.

(1) Use the plus and minus buttons to zoom in and out.

(2) To edit your date using the map, simply click on another heart with the color of your choosing. Love.ly will then update the **date template**, **itinerary**, and the **map** so that the clicked location becomes a destination in your date. Here, *Dos Toros Taqueria* got changed to *The City Bakery*, and *Baby's All Right* got changed to *Sons of Essex*.

## Date template.

### A date in NYC:

#### 1 Coffee

Joe (9.37/10) - Cost: \$

The **date template** displays 3 of the best activities from parts 1,2, and 3 of your date.

If an activity doesn't sound perfect, click on a different one in that row. If nothing we've chosen suits your fancy,

click the refresh button to fetch more suggestions as many times as you'd like!

#### 2 Arts

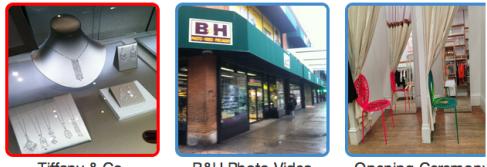

Museum of Sex (9.38/10) - Cost: not listed

The **map** and **itinerary** will automatically update themselves as you switch locations.

#### 3 Shopping

Opening Ceremony (9.48/10) - Cost: not listed

## Intenerary:

1: Joe  
9 E 13th St, 10003, New York, NY

2: Eyebeam Art + Technology Center  
540 W 21st St, 10011, New York, NY

3: Buddakan  
75 9th Ave, 10011, New York, NY

The **itinerary** summarizes your date, listing the name and full address of each stop in your date. It continually updates itself based on the changes you make on either the **map** or the **date template**, as well as when you **load** a previously **saved** date.

## Itinerary.

**Get directions.** If you place your cursor above one of the arrows

in the itinerary, it will turn green. Click on it to get directions from the place above it to the place below it.

### Save date.

By entering a name for your current date and clicking “Save my date!” you can save the date in local browser storage. It will be saved for your subsequent visits.

### Load date.

Click the “Load date” popup box to see the dates you have saved. When you select a certain date, it will automatically fill the **map**, **date template**, and **itinerary**.

### Clear saved dates.

If you click on clear all after clicking **load date**, all of your previously saved dates will be removed.
